No. 31,710, my patent attorney; with full power of substitution and revocation, to prosecute this application and to transact all business in the Patent and Trademark Office connected herewith.

I verily believe the original patent to be partially or wholly inoperative on the grounds that the patent claims less than we had a right to claim. The claims are partially inoperative in failing to cover all embodiments of our invention. For example, claim 1 and claim 11 unnecessarily require "monitoring an external time spent by the CPU." This limitation is not necessary to distinguish these claims from the prior art or to make these claims definite. These errors arose in the prosecution of the original application, which resulted in the issuance of the patent. The attorney prosecuting the original application failed to appreciate the scope of the invention, and thus, limited the claims as indicated above. Therefore, we hereby indicate a desire to seek added claims as indicated in the Preliminary

Amendment filed along with this Declaration. The errors being corrected in this reissue application up to the time of filing this declaration arose without any deceptive intention on our part. We further acknowledge our duty to disclose information which is material to the examination of the application under 37 CFR § 1.56.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
